ReadTheory

Welcome to ReadTheory!

Let's get started! Print or save this checklist and check off each item as you go (because we know how satisfying that can be)!

☐ **Step 1: Teachers Create Classes & Add Students**

If you haven't already, teachers should log into **readtheory.org** and create your classes. Creating a class is easy and takes less than 2 minutes!

◆ **Add Students By...**

1. Giving students their Class Code (you get this after creating a class).
2. Uploading your class roster via CSV Upload on the platform.

▶ **Watch:** Easy-to-Follow Tutorial **[Watch Now]**

☐ **Step 2: Students Take the Pre-test Assessment**

◆ **Teachers Introduce ReadTheory to Students**
Teachers guide students through logging into **readtheory.org** for the first time.

◆ **Students Take the Pre-test Assessment**
Teachers should allow 20–30 minutes of class time for students to complete the assessment.

☐ **Step 3: Set Weekly Goals & Expectations**

To maximize the impact of ReadTheory, teachers should set clear expectations and goals with students. **We recommend students:**

◆ **Gain 100 Knowledge Points (KPs) per week or**

◆ **Complete 7 quizzes per week**

Note. Spending approximately **20 minutes per day** on ReadTheory fosters consistent reading practice and growth. Students who engage regularly with ReadTheory achieve a **15+ point advantage** on state reading assessment scores.

💡 **Pro Tip:** Assign a **Recurring Weekly Activity** (on the activities tab) – Establish a routine and set clear expectations based on quizzes passed or completed.

ReadTheory

☐ **Step 4: Track Growth**

Visit your dashboard any time to:

◆ **See Lexile® and Grade Level progress for each student**

◆ **Check quiz accuracy and number of quizzes completed**

💡 **Tip: Upgrade to Pro** to see long-range student performance data, ELA Standards Reports, advanced Student Monitoring, and more!

☐ **Step 5: Motivate and Engage Students**

Print **certificates** to spotlight milestones, celebrate every bit of effort, and help students take charge of their progress with **Monthly Trackers**. Heck, go all out and create a **Knowledge Points Bulletin Board** to showcase growth and spark motivation!
